

## Bio of Edward Blomstedt

### Short version

Edward Blomstedt is the CEO and founder of both Combi Works and AirFaas, two innovative companies transforming industrial manufacturing. With over two decades of experience in the machine-building and construction industries, Edward's vision of revolutionizing supply chains and factory operations has made him a thought leader in digitalized manufacturing. Combi Works is a market-leader in its markets for infrastructure products like manhole covers and guardrails. And the company also provides a Factory as a Service solution which allows machine building companies to buy manufacturing and supply chains as a fully scalable service. AirFaas, often dubbed "Airbnb for factories," is enabling the manufacturing space to access global platform for factory services.

A graduate in industrial management from Aalto University, Edward was named Finland's Young Entrepreneur of the Year in 2010, recognizing his ambition in reshaping the manufacturing sector.

### Long version

Edward Blomstedt is a Finnish entrepreneur and CEO who has dedicated his career to advancing and modernizing the manufacturing sector. Since founding Combi Works in 2005, Edward has steered the company to become a leader in two distinct areas. The Infra Products division has achieved market leadership in its categories across Finland, Estonia and growing in Northern Europe, offering innovative and reliable products for infrastructure and construction projects. On the other hand, the Manufacturing Services division empowers customers to scale production efficiently, leveraging service models that enable manufacturing both locally and globally.

With operations spanning Northern and Eastern Europe, China and India, Combi Works exemplifies sustainable and strategic growth. The company's flexible service models allow customers to adapt to changing demands, ensuring that production is optimized for both proximity and cost-effectiveness. Edward's leadership reflects a commitment to blending innovation with practical solutions, making Combi Works a trusted partner for businesses seeking efficiency and precision in today's dynamic manufacturing landscape.

In 2017, Edward co-founded AirFaas, a digital platform that connects manufacturers globally, allowing users to upload product specifications and receive competitive manufacturing offers from factories worldwide. This service has been dubbed the "Airbnb of manufacturing," enabling companies to approach subcontracting in an increasingly digitalized world. AirFaas helps streamline production, optimize costs, and offers a more efficient solution to manufacturing supply chains, aligning with Edward's vision of a more sustainable future for industry.

Edward's work in the sector has earned him recognition, including the title of Finland's Young Entrepreneur of the Year in 2010, a testament to his leadership and innovation. From the tank factories of Siberia to smart manufacturing solutions for the modern age, Edward has consistently pushed boundaries, enabling industries to embrace digital transformation and smarter production methods. His commitment to building a better, more efficient global supply chain continues to inspire the next generation of industrial entrepreneurs.
